1

25X1 [redacted] Comment. The following is a tabulation of incoming and outgoing shipments handled during the period of observation:

Month	Incoming Shipments	Outgoing Shipments
	(without packing)	
April	243 carloads	250 carloads
May	293 "	224 "
June	360 "	234 "

Incoming shipments during the second three months of 1953, as compared with those in the first three months of 1953, have increased, especially in June, as a result of increased flour deliveries which were presumably consigned to the bakery in Satzkorn. On the other hand, the rate of outgoing shipments slightly decreased. The list does not contain outgoing truck shipments which, judging from previous reports, make up about 15 percent of the total output.
